

Vaibhav Gangani

Community Moderator and Full Stack Web3 Developer

Gujarat, India | vaibhav0xq.com | hello@vaibhav0xq.com | github.com/vaibhav0xq | x.com/vaibhav_0xq

Discord / Telegram: vaibhav_0xq

SUMMARY

Community moderator and full stack web3 developer. One year of paid Discord moderation at Talus Labs, Inc., covering member support, onboarding, scam escalation and events, after seven months as a volunteer. Develops products end to end, from Solidity contracts and indexers to APIs and React frontends, including Kyro, a wallet intelligence layer live on Arc mainnet.

EXPERIENCE

Discord Moderator - Talus Labs, Inc. (Remote)

Jul 2025 - Jul 2026

- Moderated the Discord community of Talus Labs, Inc., keeping day to day discussion safe and on topic.
- Handled member support, onboarding and account or role issues. Flagged and escalated scams, impersonation attempts, suspicious links and spam.
- Helped run community events and announcements and relayed technical and operational updates to members with discretion.

Community Contributor (Volunteer) - Talus Labs, Inc. (Remote)

Dec 2024 - Jul 2025

- Helped members, created community content and gave technical support on the hub. Consistent contributions led to the paid moderator role in July 2025.

Founder and Developer - Kyro, Independent

May 2026 - Present

Arc ecosystem | thekyro.co | github.com/vaibhav0xq/kyro-public | [npm: @kyrodev/sdk](https://npmjs.com/@kyrodev/sdk)

- Built and run Kyro, a wallet intelligence layer for pre-transaction checks on Arc. It indexes wallet history on Arc and five other EVM chains, verifies transaction backed attestations and returns an allow, caution or block verdict with reason codes and evidence.
- Live on Arc since mainnet launch day, September 16, 2026, with a check workbench, decision API, batch screening, TypeScript SDK on npm and OpenAPI 3.1 contract. Agent payment gate demo for ETHOnline 2026.

SELECTED WEB3 PROJECTS AND HACKATHON BUILDS

LumenMarc - Fair Value Checks for Coinbase Tokenized Stocks on Base

Sep 2026

Base ecosystem | lumenmarc.netlify.app | github.com/vaibhav0xq/lumenmarc

- Verifies a B20 token against Coinbase's published list, compares live DEX prices with its Chainlink reference feed and reports the premium or discount with oracle freshness and market session state. Public JSON API and 24 hour history. Base Build Builder Quest entry.

Suho - Recipient Checks and Guarded Sends on GIWA Sepolia

Jul 2026

GIWA ecosystem | thesuho.xyz | github.com/vaibhav0xq/suho-on-giwa

- Three Solidity contracts (registry, trust oracle, guarded send) with a 600 second recall window so a sender can cancel before a transfer is claimed, plus a console for recipient verdicts, guarded sends and an activity ledger synced from chain events.

Turnstile - Identity Bound Tickets and Access on Monad

Sep 2026 - Present

Monad ecosystem, in progress | github.com/vaibhav0xq/turnstile

- Passkey ticketing where one WebAuthn credential derives the purchase account and signs rotating entry codes, with no seed phrase or wallet app. Foundry contracts on Monad testnet with 62 tests, a sponsored ERC-2771 relayer, an Envio indexer and a 3D venue and seat picker. Monad Metropolis entry.

Earlier builds: [Receipts Network](#) (proof pages on Shelby) and [Vyom](#) (time locked capsules on Sui).

SKILLS

Community operations: Discord moderation, member support, onboarding, incident escalation, scam and impersonation response, events and announcements, Dyno, MEE6, Carl-bot, Ticket Tool

Development: TypeScript, JavaScript, SQL, React, Next.js, Tailwind CSS, Three.js, Node.js, Hono, Express, Postgres, Supabase, Drizzle, REST and OpenAPI

Web3: Solidity, Foundry, Hardhat, viem, EIP-712, ERC-2771, WebAuthn passkeys, Chainlink feeds, Envio HyperIndex, Sui Move, testnet and mainnet deployment

Tools: Git, GitHub Actions, Vercel, Netlify, Biome, Notion, VS Code

EDUCATION

Bachelor of Engineering in Computer Science & Engineering

2021 - 2024
